Simplify Insulin Dosing With a Click

Patient Selection Guidance for CeQur Simplicity™*

Current Treatment

Patient using ANY of the following treatment options:

- ☐ Insulin syringes and vials
- ☐ Insulin pen(s)
- ☐ Basal, advancing to basal bolus therapy
- ☐ Insulin pump

Glycemic Numbers

Patient not at goal OR at goal:

- ☐ Not at goal - A1C greater than 8%, time-in-range (TIR) less than 70% (for patients on CGM)
- ☐ At A1C goal and TIR goal, but looking for an easier mealtime insulin delivery option

Adherence Challenges

Patient struggling with ANY of the following mealtime insulin adherence challenges:

- ☐ Dislikes injections
- ☐ Forgets syringe/pen at home
- ☐ Difficult to inject at work
- ☐ Inconvenient to inject in public
- ☐ Wants to carry less items daily

If your patient fits any of the above, choose the CeQur Simplicity patch that's right for them.

- ☐ **CeQur Simplicity 2U 2.4ml 5 pack:**
  For patients on larger volumes of rapid-acting insulin who can handle 2-unit dosing increments.
- ☐ **CeQur Simplicity 1U 2.4ml 4 pack:**
  For insulin-sensitive patients who have lower rapid-acting insulin needs and dose in 1-unit increments.
