

Patch Tips

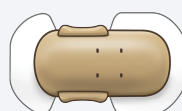

CeQur Simplicity™
MEALTIME INSULIN SIMPLIFIED™

PATCH SITES

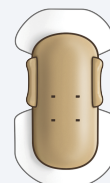

Place Patch in any blue areas.
Ensure you can click both buttons.

PATCH PLACEMENT

Place
horizontally
on abdomen
or backside

Place
vertically
on arms
or thighs

- Remove excess body hair where Patch will be placed
- Avoid lotion, sunscreen, perfume or medication around Patch area
- Use 2 alcohol wipes to clean skin: 1st to lift dirt/oils from skin, 2nd to remove dirt/oil from skin
- Allow area to fully dry prior to placing Patch
- Avoid wetting Patch for 3 hours after placement
- Rotate sites with each Patch change

If you need additional help **sticking the Patch securely and removing it gently**, below is a list of products that may help.

Baby Oil (generic) by different manufacturers	Soft moisturizer
TacAway® Adhesive Remover torbot.com	Removes adhesive residue on skin
UNI-SOLVE™ Wipes smith-nephew.com	Softens and removes residue from your skin

Mild, temporary bleeding and bruising at application sites may happen, especially if you're on a baby aspirin. If you have active bleeding at the application site, remove the Patch and replace with a new Patch in a new location. Apply firm pressure to the bleeding area with a sterile or clean cloth. **Any questions, call/text CeQur Cares at 1-888-552-3787.**
