

Job Title: Supply Chain Manager

Department: Operations – Supply Chain

Reports To: Senior Director of Operations & Supply Chain

Location: Columbia, South Carolina

CeQur® Corporation develops and commercializes a discrete, simple-to-use and wearable insulin delivery device that easily integrates into patients' daily lives. CeQur Simplicity™ is a 3 Day Insulin Patch designed to reduce the barriers and challenges of multiple daily injections to enable people with diabetes to achieve glycemic targets. CeQur Simplicity™ is FDA cleared and CE marked.

At CeQur, we aim to provide solutions to people with diabetes that are profoundly simple and clinically effective. We have built a leadership team and board that comprises of accomplished and respected industry experts. We are looking for like-minded A+ team players to join our team to help make a difference and build a legacy while driving penetration of our therapies. CeQur values a collaborative and creative mindset, where each team member is encouraged to contribute to our processes, decisions, planning and company culture.

Position Overview:

CeQur is looking for a motivated team member with positive energy that will support our manufacturing sites located in Columbia, SC and Tijuana, MX. These sites produce CeQur's Simplicity 3-day wearable insulin drug delivery system. Strong ability to work with cross functional teams from Supply Chain, Supplier Management, R&D, Quality and Manufacturing, as well as our suppliers. An ideal candidate will have the desire to learn about, and work, in an innovative, fast paced environment in the medical device industry and can perform strategic procurement utilizing lean manufacturing principles. Optimizing inventory levels and identifying cost-saving opportunities within the supply chain will be among the pillars for success.

The Supply Chain Manager will be responsible for strategically managing the following areas:

- Packaging and raw materials procurement and sourcing
- Supply Chain Capacity, Capex Budget & Planning
- Inventory management

Key Responsibilities & Essential Functions:

- Plans, directs, and coordinate Materials and Supply Chain processes.
- Manage supplier relationships and communication including monthly forecasting, escalation and resolution of challenges for supply assurance.
- Performs high level analysis on supply risk, cost and service impact of plan changes.
- Create, maintain and review reporting metrics to identify opportunities for reducing cost and/or improving service throughout all facets of the supply chain.
- Develop and apply supplier scorecard methodology, establishing a cadence for business reviews.
- Responsible for negotiation of contracts with key suppliers including cost, terms of supply and quality.
- Purchase raw materials and components for daily operations, with a focus on balancing long lead times with working capital KPIs.
- Establish minimum and maximum stocking levels.
- Develop SOPs for recording all inventory transactions.
- Strategic member of our NetSuite ERP optimization team with a focus on system configuration and documentation of business processes within procurement.
- The candidate is expected to learn on the job about the functionality of our medical device.
- Other tasks and projects as assigned.

Job Specifications: Education, Background and Qualification Requirements:

- Associates Degree
- ERP System Experience (3) Years – NetSuite Preferred
- Sourcing experience 3 Years
- Logistics experience a plus
